The NHSaves@Work/Small Business Energy Solutions Program provides small business customers with financial incentives to incorporate energy-efficient measures in the workplace.

The Small Business Energy Solutions Program is specifically designed for business customers with an average monthly demand of less than 100 kilowatts (kW). NHSaves@Work/Small Business Energy Solutions is a turnkey service which provides qualified evaluation, technical advice, and installation of a range of energy-efficient measures.

This program is tailored to the specific needs of your business, and will help lower your energy costs while upgrading the performance of your building.

The mission of NHSaves is to advance the efficient use of energy, while caring for the environment and promoting economic development in New Hampshire.

small business energy solutions

**Save Energy,
Save Money,
and Enhance
Your Work
Environment**

**Public Service
of New Hampshire**

Save Energy, Save Money, and Enhance Your Work Environment

The NHSaves@Work/Small Business Energy Solutions Program provides you with both the financial incentives and technical assistance you need to make your workplace more energy-efficient.

Through this program, Public Service of New Hampshire will pay up to a maximum of 50%* of labor and material costs for installation of these energy-efficient measures.

As part of the Small Business Energy Solutions Program, Public Service of New Hampshire will provide you with a comprehensive energy analysis at no cost. This energy analysis will identify opportunities for enhancing the energy efficiency of your business.

Small Business Energy Solutions is a turnkey service, from energy analysis to installation.

Public Service of New Hampshire will assign a qualified energy contractor who will provide you with a written proposal outlining the recommended energy-efficient improvements. This proposal will include a detailed explanation of each energy-efficient improvement, a review of projected energy and cost savings, and the estimated return on your investment. The contractor will also walk you through the retrofitting process and answer any technical questions you may have.

Once you have agreed on which measures to install, a qualified energy contractor will schedule and install the energy-efficient measures at your convenience. Public Service of New Hampshire will ensure quality control throughout this process.

Depending on the energy analysis findings, a wide array of new energy-efficient technologies are available to replace your inefficient equipment, including:

- ♦ Energy Efficient Fluorescent Ballasts, Lamps and Fixtures
- ♦ Hard-wired & Screw-in Compact Fluorescent Systems
- ♦ High Intensity Discharge Lighting Systems
- ♦ Occupancy Sensors
- ♦ Programmable Thermostats
- ♦ Electric Hot Water Tank Wraps
- ♦ Cooler Door Heater Controls
- ♦ Walk-in Cooler Economizers

I want to know more about energy efficiency.
